

"I need CEUs."

After you have completed the course modules, look for a link "I need a Certificate of Completion" at the bottom of the course page. Click the link to be directed to your post-test. You must score a minimum of 70% on this test in order to receive the certificate of completion. After you have submitted the test, you will be provided with the option to download your certificate of completion. The certificate will indicate the number of course contact hours and approved credits (CCUs) offered by The Federation of State Boards of Physical Therapy (FSBPT). A course self-reflection is provided as well to assist with the application of learning to clinical practice. Please also complete the course evaluation, as we value your feedback!

The FSBPT course credits are currently accepted by the following physical therapy boards. The FSBPT provides certification in CCUs, please consult with your state board rules for submission specifics on FSBPT certified courses (each state is different).
